

# ROAD MAP OF our Physical Education & Sport Science Curriculum

Isca's PE & Sport Science departments aim is to create a learning environment where students are encouraged to take risks, develop confidence, improve physical literacy and take ownership of their learning, regardless of their ability. With every student in mind, our PE department offers an exciting and extensive curriculum to ignite a passion for sport. Throughout each year students have the chance to participate, lead and umpire across a wide range of sport and physical activities. Students also have many opportunities to compete in a wide variety of sporting activities with the intention to build character and to embed values such as fairness and respect. Our intention is that every student develops a love of learning and a desire to lead a lifelong healthy and active lifestyle.
